

3-D Texture Art

*We will use these next week to make a 3-D Fashion Project

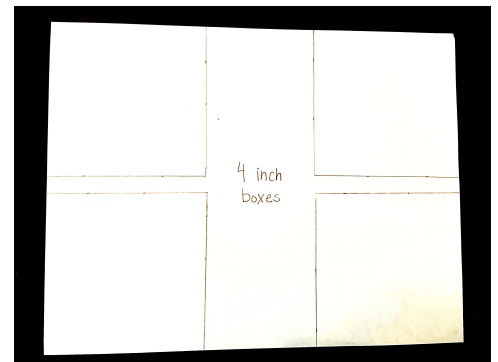

Assignment: Create 4 squares showcasing a different texture. Use printer paper and cut, crumple, roll, twist and fold. Glue using a glue stick or liquid glue. Don't have any glue? Then use tape.

Here are my results:

Directions:

Step 1: Print out the template for the 4 squares. Cut them out. Don't have a printer? Measure and cut 4 boxes that are 4 inches.

Step 2: Look at the pictures on the next page and experiment with the paper to see what 3-D textures you come up with!
